1 Surfing the movie space: advanced navigation in movie-only hypermedia
Jörg Geißler
January 1995 **Proceedings of the third ACM international conference on Multimedia**
Publisher: ACM Press
Full text available: ⧉ htm(57.79 KB)   Additional Information: full citation, references, citings, index terms

Keywords: browsing and navigation, hypermedia, interactive movies, media integration and synchronization, movie structure, user interfaces

2 Object-oriented logical specification of time-critical systems
Angelo Morzenti, Pierluigi San Pietro
January 1994 **ACM Transactions on Software Engineering and Methodology (TOSEM)**, Volume
                Issue 1
Publisher: ACM Press
Full text available: ⧉ pdf(3.05 MB)   Additional Information: full citation, abstract, references, citings, index terms, review

We define TRIO+, an object-oriented logical language for modular system specification. TRIO+ based on TRIO, a first-order temporal language that is well suited to the specification of embedded and real-time systems, and that provides an effective support to a variety of validatic activities, like specification testing, simulation, and property proof. Unfortunately, TRIO lacks th ability to construct specifications of complex systems in a system ...

Keywords: first-order logic, formal specifications, model-theoretic semantics, object-oriented methodologies, real-time systems, temporal logic

3 View management in multimedia databases
K. Selçuk Candan, Eric Lemar, V. S. Subrahmanian
July 2000   **The VLDB Journal — The International Journal on Very Large Data Bases**, Volume
                Issue 2
Publisher: Springer-Verlag New York, Inc.
Full text available: ⧉ pdf(322.82 KB)   Additional Information: full citation, abstract, index terms

Though there has been extensive work on multimedia databases in the last few years, there is r prevailing notion of a multimedia view, nor there are techniques to create, manage, and mainta such views. Visualizing the results of a dynamic multimedia query or materializing a dynamic multimedia view corresponds to assembling and delivering an interactive multimedia presentatic

in accordance with the visualization specifications. In this paper, we suggest that a non-interact multimedia prese ...

Keywords: Interactivity, Multimedia databases, Prefetching, Result visualization/presentation, View management
